Aníbal Alberto Alpizar Campos

Software Engineer

+506 7169 9681 | anibal.alpizar14@gmail.com | github.com/anibalalpizar / anibalalpizar.github.io

OBJECTIVE

Software Engineer with development skills. Committed to effective communication and motivated to learn. I am looking for a position where I can apply and develop my skills in a dynamic professional environment.

SKILLS

- React, Nextjs, Nodejs, Angular, JavaScript, TypeScript, Git, C# Web MVC, Java EE Web, SQL, MySQL
- Operating Systems, Backend, Frontend, Agile

EXPERIENCE

Freelance Project: *Software Developer (.NET and SQL)* 08/02/2022 – 12/15/2022

- Collaborated with a medical professional to develop a desktop application, addressing challenges in the manual prescription creation process.
- Prior to implementation, manual processes caused inefficiencies; post-implementation, time spent on prescriptions significantly decreased.
- Streamlined processes not only increased efficiency but also minimized errors, improving overall patient care and satisfaction.

Asoc. Hogar El Buen Samaritano: *Software Developer (.NET and SQL)* 03/26/2023 - 08/07/2023

- Addressed a pre-existing challenge in inventory management through the development of a comprehensive application during a University Community Work Project (TCU).
- Collaborated closely with the staff of Asociación Hogar El Buen Samaritano to understand their specific needs and challenges in the existing inventory control system.
- Prior to the application, manual inventory processes led to inefficiencies and potential errors.
- After implementation, the new system significantly reduced time spent on inventory tasks, minimizing errors and enhancing overall organizational efficiency.

Microsoft Student Ambassador 01/20/2024 – 08/03/2024

- Engage with fellow students to promote Microsoft technologies and initiatives.
- Organize and participate in campus events related to technology and innovation.
- Collaborate with Microsoft teams to provide feedback on products and services.

Techkepper - Internship: *Software Developer (Nextjs and Nodejs)* 05/15/2024 – 08/25/2024

- Modernize and optimize order management and operations in a restaurant, replacing inefficient and error-prone manual methods.
- The main problem was inefficiency in order management and the lack of a solution that improves the user experience, affecting staff and customers.
- The new web application automates order management, significantly reducing errors and speeding up service time. This resulted in greater operational efficiency and a better experience for customers, improving overall satisfaction and service quality.

EDUCATION

Universidad Técnica Nacional | Sede Central

Diploma in Information Technology 2021 - 2023
Bachelor of Software Engineer 2023-2024

Colegio Técnico Profesional de Flores | Heredia

Intermediate IT Technician in Support 2019 - 2021

SKILLS & INTERESTS

- Languages: Spanish (native), Intermediate English.
- Passionate about sharing knowledge, regular contributor to open source projects.
